A. *adj.* Of or belonging to the Old English kingdom of Mercia or its language.

Although the political limits of Mercia were different at different periods, it may broadly be said to have occupied the middle of South Britain, between Deira on the north and Wessex on the south, and between Wales on the west and Lindsey and East Anglia on the east. The Mercian dialect of Old English belongs to the Anglian (as opposed to the Saxon) division, and is the dialect from which modern standard English mainly descends.

Mercy (mə́ːrsi), *sb.* Forms: 2–5 merci, 4–6 mersy, mercye, 4–7 mercie, 5 merce, 6 mersye, *Sc.* marcie, 3– mercy. [a. F. *merci*, earlier *mercit* = Pr. *merce-s*, Sp. *merced*, Pg. *mercé*, It. *mercede* :— L. *mercēdem* (nom. *mercēs*) reward, fee, in Christian Latin from the 6th c. often used in the sense of *misericordia* (= 1 below) and in that of thanks.]
The post-classical uses of *mercēs* are developed from the specific application of the word to the reward in heaven which is earned by kindness to those who have no claim, and from whom no requital can be expected. The Eng. uses explained below represent OF. senses that for the most part have not survived in Fr., where the word has been in great part superseded by *miséricorde*. The chief uses of *merci* in mod. Fr. are in the sense 'thanks' (cf. GRAMERCY), and in phrases corresponding to those in 5 below.

[OE. *mere* str. masc., corresp. to OS. *meri* fem., sea (MDu., MLG. *mere* fem., neut., Du. *meer* neut., sea, pool), OHG. *meri, marī* (MHG., mod.G. *meer*) neut., sea, ON. *mar-r* masc., sea (MSw. *mär*, MDa. *mær* are from MLG.), Goth. *mari-* (nom. **mar*) in *mari-saiws* sea (also the derivative *marei* :—OTeut. type **marîn-* wk. fem.) :—OTeut. **mari-* :—WAryan **mori-* or **mori-*, represented in OSl. and Russ. MOPE, OIrish *muir*, Welsh *mor*, L. *mare* neut. (It. *mare*, Pr., Sp., Pg. *mar*, F. *mer* fem.).

The word is often referred to the Indogermanic root **mer-* (: *mor-*, *mr-*) to die, and supposed to have originally designated the sea as 'lifeless' in contrast with the land as abounding in vegetable life; but this is very doubtful; Brugmann suggests that the *r* may belong to the suffix.

The form *marr* (14th c. *marre*), occurring in senses 2 and 4, is abnormal. Cf. ON. *marr* (which, however, is known only in the sense 'sea'), and F. *mare* pond (from 12th c.).]

1. The blackbird, *Turdus merula*. *arch.*

Perhaps never in popular use, but constantly occurring in Scottish poetry from the 15th c. Drayton adopted from some Scottish poet the traditional association of 'mavis and merle', which he frequently repeats, and which in the 19th c. often appears in English and American poetry from imitation of Scott or Burns. As used by Caxton and perh. by Philemon Holland, the word is an independent adoption from French.

It is disputed whether the word was adopted from Rom. into Teut., or vice versa; Kluge regards it as originally Teut. The view of Diez, that it represents L. *merula* (see Merle) with prefixed *s*, is unlikely both on account of form and sense.

A few examples of forms without initial *s* occur outside Eng., e.g. med.L. *merillus* (Germany, 15th c.), G. *merle*, *mirle* (Nemnich), early mod.Flemish *merlijn*, *marlijn* (Kilian); their relation to the longer forms is obscure.]

A European species of falcon, *Falco æsalon* or *lithofalco*, one of the smallest, but one of the boldest, of European birds of prey; the male bird (distinguished as *jack-merlin*: see Jack *sb.*[1] 27, 37) is remarkable for the beauty of its plumage. In recent use sometimes in a wider sense, corresponding to the mod.L. *Æsalon*, as applied by some ornithologists to a subdivision of the genus *Falco* including the merlin proper and some closely allied species.

In the 17th c. some writers regarded the name as properly belonging to the female bird.

The transition from the assumed original sense 'short' to the OE. sense 'pleasant' is somewhat difficult, but may have been brought about through the intervention of a derived factitive verb, meaning 'to shorten', and hence 'to shorten time', 'to cheer'; cf. ON. *skemta* to amuse, f. *skamt*, neut. of *skamm-r* short.]

Merry-andrew, Merry-Andrew (meri,-æ·ndru). [app. f. Merry *a.* + *Andrew* proper name (cf. Andrew 2).

Hearne's statement, in the preface to his edition of Benedictus Abbas (1735) that 'Merry Andrew' was originally

applied to Dr. Andrew Borde (died 1549) has neither evidence nor intrinsic probability, though Borde had a reputation for buffoonery, as is shown by the traditional attribution to him of various collections of jests. In 1668 (29 Aug.) Pepys says that he saw at Bartholomew Fair a ridiculous play called 'Marry Andrey', but that this title has any connexion with *merry-andrew* is very doubtful.]

Mesfeat, variant of MISFAIT *Obs.*

Mesh (meʃ), *sb.* Forms: 6–7 **meishe, meash,** 6–8 (9 *dial.*) **mash,** (8 **marsh**), 6– **mesh.** [Known only from the 16th c.; cogn. w. OE. *max* (? **mæsc.*) neut., net and ON. *mǫskve* (see MASK *sb.*[1]); but the precise nature of the relation is undetermined.

The Teut. langs. have words with this meaning representing two ablaut-types: (1) OTeut. **mask-* (OE. *max*, ? **mæsc* ? neut.; OHG. *masca*, MHG., mod.G. *masche* fem.; M.Du. *masche* fem.; ON. *mǫskve*, Norw. *moske* wk. masc.; Sw. *maska*, Da. *maske* fem. are from LG.); (2) OTeut. **mâsk-* (OHG. *mâsca*, MHG. ? *mâsche*; MDu. *maesche*). The Eng. form *mash* would regularly represent an OE. **mæsc*, but the OE. word occurs only once in the metathetic form *max*, and in that instance means 'a net'. The 16th c. forms *meishe, meash*, indicate a pronunciation with long vowel, mēʃ; for the shortening to *mesh* cf. *flesh*. On the whole, on account of the absence of the word in ME., its form-history in the 16th c., and the frequency with which fishing terms were adopted from Du., it seems not improbable that *meash* (shortened to *mesh*) and *mash* represent adoptions respectively of the MDu. forms *maesche* and *masche*. The resemblance between the Eng. form *marsh* (18th c.) and the Flemish *maersche* (Stallaert) is prob. accidental.

The Teut. **mâsk-* (: **mask-*) is cognate with the Lithuanian *mezgù* I knit, *mazgas* knot.]

Messiah (mėsəi·ă). Forms: *α.* 4 **Messie,** 4–5 **Messye,** 5 **Messy, Messe, Myssye**; *β.* 3 **Messyas,** 4–8 **Messias**; *γ.* 7 **Messiah.** [The *α* forms are a. F. *Messie*, ad. L. (Vulg.) *Messīās*, a. Gr. Μεσσίᾶς, ad. Aramaic מְשִׁיחָא *m'shīḥā*, Heb. מָשִׁיחַ *māshīaḥ* anointed (in the LXX rendered Χριστός, CHRIST), f. מָשַׁח *māshaḥ* to anoint. These forms do not occur in any Eng. transl. of the Bible, though common in other literature down to the 15th c. The form *Messias* was used in John i. 41 and iv. 25 (the only passages in which the word is found in the Gr. or Latin N.T.) by Wyclif after the Vulgate, and by later translators from 1526 to 1611 directly after the Greek. The form *Messiah*, invented by the translators of the Geneva Bible of 1560, is an alteration of the traditional *Messias*, intended to give it a more Hebraic aspect (the translators having on principle eliminated the Græcized forms of proper names from the O.T., though retaining them in the N.T.). In the Bible of 1611 it was adopted in Dan. ix. 25, 26, and although it occurs in no other passage of the 'Authorized Version', it eventually became the only current form. The Revisers of 1880–84 have substituted it for *Messias* in the two N.T. passages, but on the other hand have removed it from its original place in Dan. ix, where they read 'the anointed'.] The Hebrew title (='anointed') applied in the O.T. prophetic writings to a promised deliverer of the Jewish nation, and hence applied to Jesus of Nazareth as the fulfilment of that promise. (Chiefly preceded by *the* or defining word, exc. in the three Bible passages and sometimes in poetry, where it is treated as a proper name.) Hence *transf.*, an expected liberator or saviour of an oppressed people or country. (Written with capital M.)

‖ **Meta** (mī·tă). *Rom. Antiq.* Pl. **metæ** (mī·tī). [L. *mēta.*] One of the conical columns set in the ground at each end of the Circus, to mark the turning-place in a race. Hence *transf.* A boundary.

1577 HARRISON *Descr. Brit.* I. 2 in *Holinshed*, So that the aforesaid line shall henceforth be their *Meta* and partition from such as be ascribed to America. 1662 RAY *Three Itin.* III. 183 In Somersetshire they have a way of setting their mows of corn on a frame..standing upon four stones cut with a shank, and upon that an head like a meta. 1845 *Athenæum* 1 Feb. 126 We have the cross erected between two 'metæ'.

Meta- (me·tă), *prefix*, before a vowel normally met- (also before *h*, the resulting *meth-* being pro-

nounced meþ), repr. Gr. *μετα-*, *μετ-* (*μεθ-*), which occurs separately as the prep. *μετά* with, after; etymologically corresponding to MID *prep.* In Gr. the prefix is joined chiefly to verbs and verbal derivatives; the principal notions which it expresses are: sharing, action in common; pursuit or quest; and, especially, change (of place, order, condition, or nature), corresponding to L. *trans-*. In some few formations *μετα-* represents the prep. *μετά* in syntactical combination, with the sense after or behind, as in *μετάφρενον* METAPHRENON.

The words derived from Gr. words containing the prefix, or from assumed Greek types normally constructed, are given in their alphabetical place. The words enumerated in this article are modern formations, in which the prefix is employed in ways not strictly in accordance with Greek analogies. The prefix is often hyphened, and the *a* remains unelided before a vowel or *h*.

1. The supposed analogy of METAPHYSICS (misapprehended as meaning 'the science of that which transcends the physical') has been followed in the practice of prefixing *meta-* to the name of a science, to form a designation for a higher science (actual or hypothetical) of the same nature but dealing with ulterior and more fundamental problems. **Metache·mistry** ? *nonce-wd.*, the chemistry of the supersensible. **Metamathema·tical** *a.*, beyond the scope of mathematics. **Metamathema·tics**, 'the metaphysics of mathematics; the philosophy of non-Euclidean geometry and the like' (*Cent. Dict.* 1890). **Metaphysio·logy**, a name invented by G. H. Lewes for a doctrine of life and vital phenomena which should base itself on principles ontside of and higher than those of physiology and the material organism; hence **Metaphysiolo·gical** *a.*, **Metaphysio·logist**. **Metatheo·logy** *nonce-wd.*, a profounder theology than that recognized by divines. Similarly in **Meta·element**, **Metagno·stic** *a.* [cf. GNOSTIC *a.*], **Metaorganism** (see quots.); **Metapheno·menal** *a.*, existing behind phenomena. See also METAGEOMETRY, METEMPIRIC.

6. In *Chemistry.* **a.** *Meta-* is used to designate compounds derived from, metameric with, or resembling in composition those to the names of which it is prefixed, as *metachloral*, METALDEHYDE, etc. More systematically, it is used to distinguish one class of acids and their corresponding salts from another class (the ORTHO- acids) consisting of the same elements in different proportions, the *meta-* acids containing one, two, or three molecules of water less than the *ortho-* acids; the salts of these acids have names formed by replacing *-ic* by *-ate*. (A few of these compounds will be found in their alphabetical place; the most important of those remaining are placed below.)

The use of the prefix in chemistry was first introduced by Graham in 1833 (*Phil. Trans.* 253): see METAPHOSPHATE, METAPHOSPHORIC. The more definite use (correlated with *ortho-*) was introduced by Odling in 1859.

b. In the names of isomeric benzene di-derivatives, *meta-* denotes those compounds in which the two radicals that replace hydrogen in the benzene-ring are regarded as attached to alternate carbon atoms. 1. Any member of the class of substances represented by gold, silver, copper, iron, lead, and tin. Originally this class was regarded as including only these bodies together with certain alloys (as brass and bronze), and hence as definable by their common properties, viz. high specific gravity and density, fusibility, malleability, opacity, and a peculiar lustre (known specifically as 'metallic'). In process of time other substances were discovered to have most but not all of these properties; the class was thus gradually extended, the properties viewed as essential to its definition becoming fewer. From the point of view of modern Chemistry, the 'metals' are a division (including by far the greater number) of the 'elements' or simple substances. Among them are all the original (simple) 'metals'; of the later additions to the list some possess all the properties formerly viewed as characteristic of a metal, while others possess hardly any of them; the 'metallic lustre' is perhaps the most constant. By some chemists the radical ammonium (NH_4) and derivatives thereof have been designated as 'metals', on account of the analogy of their compounds with those of the metals potassium and sodium.

In popular language the term is not applied to a metallic element when in such a state of combination that its identity is disguised. (Cf. Metallic *a.* 2.)

Metaphysics (metăfi·ziks), *sb. pl.* [pl. of Metaphysic *sb.*, repr. med.L. *metaphysica* (neut. pl.), med.Gr. (τὰ) *μεταφυσικά* (neut. pl.), an alteration of the older *τὰ μετὰ τὰ φυσικά*, 'the (works) after the Physics' (cf. Meta- and Physics), the title applied, at least from the 1st century A.D., to the 13 books of Aristotle dealing with questions of 'first philosophy' or ontology.

This title doubtless originally referred (as some of the early commentators state) to the position which the books so designated occupied in the received arrangement of Aristotle's writings (*τὰ φυσικά* being used to signify, not the particular treatise so called, but the whole collection of treatises relating to matters of natural science). It was, however, from an early period used as a name for the branch of study treated in these books, and hence came to be misinterpreted as meaning 'the science of things transcending what is physical or natural'. This misinterpretation is found, though rarely, in Greek writers, notwithstanding the fact that *μετά* does not admit of any such sense as 'beyond' or 'transcending'. In scholastic Latin writers the error was general (being helped, perhaps, by the known equivalence of the prefixes *meta-* and *trans-* in various compounds); and in English its influence is seen in the custom, frequent down to the 17th c., of explaining *metaphysical* by words like 'supernatural', 'transnatural', etc.]

Metembryo (metɛ·mbrĭ,o). [f. META- + EMBRYO.] The gastrula stage of a metazoon.

1887 HYATT in *Proc. Boston Soc. Nat. Hist.* 397 The proper name for these stages would .. be Metembryo, in allusion to the fact that the ovum at this stage is probably essentially a Metazoon.

Hence **Metembryo·nic** *a.*, 'of or pertaining to a metembryo' (*Cent. Dict.* 1890).

Metempiric (metempi·rik). [f. META- + EMPIRIC.

Introduced, together with the related words, by G. H. Lewes in 1874.]

1. (Also **Metempirics** with sing. construction: cf. *metaphysic, metaphysics.*) The philosophy of things that lie outside the sphere of knowledge derived from experience.

The writers quoted differ greatly in their application of the term, but the question between them is what is meant by 'experience'; the definition given above would be accepted on both sides.

1874 LEWES *Probl. Life & Mind* Ser. I. I. 18 Metempirics sweeps out of this region in search of the *otherness* of things. *a* 1881 A. BARRATT *Phys. Metempiric* xi. (1883) 130 Any metempiric which does more than numerically multiply, or vary in degree, existence such as we have it in experience, or which postulates beings whose qualities bear no resemblance to those of experience, must be at once rejected.

2. One who believes in or supports metempirical philosophy; a metempiricist.

a 1881 A. BARRATT *Phys. Metempiric* iii. (1883) 19 Every man who believes in the consciousness of his fellows—every man who uses the word 'we'—is a Metempiric. 1882 in OGILVIE, and in later Dicts.

Metempirical (metempi·rikăl), *a.* [f. META- + EMPIRICAL.] Pertaining to matters outside the range of knowledge derived from experience. Also, of opinions and their advocates: Maintaining the validity of concepts and beliefs based otherwise than on experience.

1874 LEWES *Probl. Life & Mind* Ser. I. I. 17 If then the Empirical designates the province we include within the range of Science, the province we exclude may fitly be styled the Metempirical. *a* 1881 A. BARRATT *Phys. Metempiric* ii. (1883) 17 The simplest Metempirical assumption, and one made by every man, is that there *is* a Metempirical existence, that he and his own experience are not all that has ever existed. 1888 *Athenæum* 11 Feb. 184 It appropriated for empiricism doctrines hitherto the special property of metempirical schools.

Hence **Metempi·rically** *adv.*, in a metempirical sense or manner.

1884 *Spectator* 2 Feb. 161 Every atom .. is .. 'metempirically', as he [*sc.* Barratt] calls it—a centre of consciousness.

Meter: see METRE ¹ and ².

-meter, in actual use commonly *-o·meter*, and in some later formations *-i·meter*, a terminal element in words denoting scientific instruments for automatically measuring something. Many words with this ending, as *barometer, hydrometer, hygrometer, thermometer*, were formed in the 17th c., and represent mod.L. forms in *-metrum* (F. *-mètre*, It. *-metro*). In these early examples the ending is always appended to Gr. noun-stems, or combining forms in *-o*, and the mod.L. form shows that it was intended to represent the Gr. *μέτρον* measure (see METRE ¹); the formation is irregular, as the Gr. word does not occur in combination with sbs., and would not correctly express the required notion of 'instrument that measures'. In the 18th and 19th c. many additional words were formed with this ending on Greek bases, as *actinometer, anemometer, chronometer, eudiometer*, etc. Near the end of the 18th c. hybrid formations began to be introduced (many of them first occurring in Fr.). In some of these the form of Greek compounds is imitated, as in *gasometer, galvanometer, alcoholometer, lactometer, pedometer*; in others the combining-vowel *i* of the Latin first element is retained, as in *calorimeter, gravimeter, densimeter, velocimeter.* In some late formations *-meter* is appended to modern words without any attempt to assimilate the form of the first element to that of a Gr. or Latin combining form, as in *voltameter, ammeter.* Cf. also the names of electrical measuring instruments mentioned under METER *sb.*³ 1 b, which might perhaps be more correctly viewed as examples of the suffixed *-meter* than as examples of the sb. with defining word.

Jocular nonce-words in *-ometer* have been frequently formed; chiefly in imitation of Sydney Smith's FOOLOMETER, with the sense 'a means of measuring or ascertaining the opinion or prevalent

character of some class of people'; also occasionally in names of imaginary instruments for measuring the amount or degree of something, as in *obscenometer*. Similar hybrid formations have sometimes been adopted as trade names for certain instruments, e.g. *comptometer* [F. *compte* account], a kind of calculating machine, *distance-ometer*.

Methinks (mɪ̇þi·ŋks), *impers. v.* Now *arch.* and *poet.* Pa. t. **methought** (mɪ̇þɒ·t). Forms: see below and cf. THINK *v.*[1] [OE. *mé þyncþ* (pa. t. *mé þúhte*), where *mé* is dative, and *þyncþ* the 3 pers. sing. of *þyncean* to seem: see THINK *v.*[1]

As THINK *v.*[1] did not, exc. in this phrase, survive beyond the 14th c., and had no very wide currency after 1250, the syntax of *methinks* became obscure. Hence it underwent various alterations of form. The verb being supposed to be THINK *v.*[2], it followed that it ought to be in the first person; hence the form *me think*, in which probably the pronoun was still correctly apprehended as a dative. In the 16–17th c. there occur the forms *my think*, *my thought(s*, which are attempts to obtain a normal syntax by taking *think*, *thought*, as sbs. The curious form *methoughts*, used in the 17th and the first half of the 18th c., prob. owes its *s* to the analogy of the present tense *methinks*.]

Methodist (me·thŏdist). [ad. mod.L. *methodista*: see METHOD *sb.* and -IST. Cf. F. *méthodiste.*]

1. *Hist.* A physician of the 'methodic' school. (See METHODIC *a.* 1.) In the 17th c. sometimes applied to the regular or orthodox medical practitioners of the day, in contradistinction to those who favoured the use of new remedies.

According to Celsus, the members of this school (called in Latin *methodici*, in Gr. *μεθοδικοί*) differed from the Dogmatic school in basing their treatment not on principles deduced from a classification of diseases according to their origin, but on the theory that morbid conditions consisted either in 'looseness', 'tightness', or a mixture between the two (*fluens, strictum, mixtum*), each of the three states having its appropriate set of remedies. The founder of the school was Themison, about A.D. 100.

4. a. Originally, a term applied to the members of a religious society (nicknamed 'the Holy Club'), established at Oxford in 1729 by John and Charles Wesley and other members of the University, having for its object the promotion of piety and morality; subsequently applied to those who took part in or sympathized with the evangelistic movement led by the Wesleys and George Whitefield. **b.** In later use, a member or adherent of any one of a number of religious bodies or denominations which originated directly or indirectly from the labours of the Wesleys and Whitefield.

In England, the designation belongs especially to the members and adherents of the Wesleyan-Methodist Society founded by John Wesley, and of the various other bodies that have proceeded from it or from each other by succession, as the New Connexion Methodists, the Primitive Methodists, the United Methodist Free Church, and others. All these bodies accept in the main the Arminian theology of Wesley, and in nearly all of them the ministers (called 'travelling preachers') change their place of abode after a certain period (usually three years). In the U. S. the most influential body of Methodists is the Methodist Episcopal Church, which was directly founded by John Wesley (who ordained its first bishop, Dr. Coke), and which is recognized by the English Wesleyan-Methodist Society as in full communion with it. There are also several other bodies in the U. S. that adopt the name as a part of their official designation. In Wales the name 'Methodists' commonly denotes the body more fully known as 'Calvinistic Methodists', which was founded by Welshmen influenced by the teaching of Whitefield; it is now federated with the United Free Church of Scotland and the Presbyterian Church of England.

The origin of the name, as applied to the associates of the Wesleys at Oxford, is somewhat obscure. Cf., however, sense 3 a, and the 17th c. use in examples like quots. 1647, 1658, in sense 2.

The G. *methyl* occurs in papers by Regnault in *Ann. der Pharmacie* XXXIII. 328 and XXXIV. 28 (1840). The

back-formation was suggested by the fact that *-yl* (which Berzelius preferred to spell *-ule*), from the Gr. ὕλη in the sense of 'matter', had already been used in names of organic radicals (*benzoyl*, Wöhler & Liebig 1832; *ethyl*, Liebig 1834). †**Miching malicho.** Occurs only in the Shaks. passage quoted, and echoes of it; of uncertain form, origin, and meaning.

It is probable, though hardly certain, that the first word is MICHING *ppl. a.* The conjecture that the second word represents Sp. *malhecho* misdeed (whence Malone and subsequent editors print *mallecho*) yields a fairly satisfactory sense; but there is no evidence that the Sp. word was familiar in English, and its pronunciation (malet∫o) does not account for the forms in the early editions.

The root **meg-* (represented also in Armenian *mets* great, and perh. in L. *magnus*) appears to be allied to the Aryan root **magh-* of Skr. *mah, maha, mahan* great.

The OE. form *mycel* (which is not a mere graphic variant of *micel*, but stands for an actual pronunciation) is difficult to explain; it is commonly supposed to be due to association with *ỹðel* LITTLE *a.* The similar change of *i* into *y* in ON. *mykell, mykl-*, is believed to proceed from the influence of the *u* in the inflected forms *miklu, miklum*; but this explanation is not applicable to OE.

The phonology of the ME. and modern forms is in many points obscure. Normally, OE. *y* would become in the S.W. *u*, pronounced (ü), and elsewhere *i*; the abnormal *u* (in ME. also written *o*) of the β and ε forms has not yet been satisfactorily explained. The forms with *k* are northern and north-midland; the regular southern forms with *ch* are obsolete, having given place to the shortened *mich*, MUCH.

In present dialectal use the prevailing form is *muckle*; but *mickle* and *meikle* are often used by modern Scottish writers even when their own colloquial dialect has only *muckle*. The archaistic use in non-dialectal poetry is rare, and almost confined to the form *mickle*.]

A. *adj.*

1. In partitive concord, expressing adjectivally the sense: (The) middle or midst of. (In mod. Eng. usually hyphened.)

Originally *mid* in this sense could be used without restriction, but in mod.Eng. its application has been greatly narrowed. It is still extensively used in scientific and technical language; and it is common (though rather literary than colloquial) in advb. phrases formed with *in* prep., the article being most frequently omitted, as *in mid-career*, *in mid-volley* (see d); but the use of phrases of this type not traditionally current is apt to seem affected. The attributive use of the combinations of *mid-* is also frequent.

[f. either MID *a.* or MID *prep.* (*adv.*) + WIFE (in the older sense of 'woman'). On the former view the primary sense would be 'a woman by whose means the delivery is effected'; on the latter view, 'a woman who is *with* the mother at the birth'. The latter seems the more likely, though analogies are wanting for this mode of formation. The Sp. *comadre*, which is sometimes quoted, is not to the point, as the sense 'midwife' is merely developed from that of 'gossip', originally 'fellow-(god)mother'. The mod.G. *beifrau*, midwife's assistant, has also been compared.

The early (but not earliest) form *medewife* seems to be due to etymologizing association with MEED *sb.*, as *mede-* does not otherwise occur as a ME. variant of *mid-*. The colloquial pronunciation (mi·dif) is now seldom heard.]

1. Originally, the Roman lineal measure of 1,000 paces (*mille passus* or *passuum*), computed to have been about 1,618 yards. Hence, the unit of measure derived from this, used in the British Isles and in other English-speaking countries. Its length has varied considerably at different periods and in different localities, chiefly owing to the influence of the agricultural system of measures with which the mile has been brought into relation (see FURLONG). The legal mile in the British Empire and the U.S. is now 1,760 yards. The Irish mile of 2,240 yards is still in rustic use. The obsolete Scottish mile was longer than the English, and probably varied according to time and place; one of the values given for it is 1,976 yards.

The use of the sing. form with a plural numeral is now only vulgar or dialectal; in the earlier part of the 19th c. it was recognized as permissible colloquially.

2. Used to render its etymological equivalent in other European languages.

In Italy (where there are many different miles), Spain, and Portugal, the 'mile' has been developed from the ancient Roman measure, and its length ranges between ¾ and 1¼ English mile. In Germany, Austria, Holland, and the Scandinavian countries, on the other hand, the 'mile' seems to represent the ancient Germaoic *rasta*, to which the Latin name was nparently applied arhitrarily; its values range from about 3¼ to over 6 English miles.

3. *Geographical, geometrical,* †*maritime, nautic(al mile*: a measure of length = one minute of a great circle of the earth.

Owing to the fact that the earth is not a true sphere, the 'mile' as thus defined varies considerably, the difference between the extreme values being about 62 feet; when taken as a minute of the meridian, the value increases with the latitude, in consequence of the varying curvature. It has therefore been found convenient to assign a standard value for nautical use; the British Admiralty fixes it at 6,080 feet.

The militia consists of bodies raised by the several counties in numbers varying according to the population and other circumstances, the number or 'quota' to be provided by each shire being fixed by the government. Since 1803, the law has been that the quota may, if necessary, be raised by compulsory enlistment, a ballot being taken among the men between 18 and 35; but as sufficient numbers are at present obtainable by voluntary enlistment, a 'Militia Ballot Suspension Act' is passed annually. The militia are bound to assemble for 28 days in every year for training, and may at any time be embodied for compulsory service within the kingdom, but cannot be sent abroad except as volunteers, and then only by consent of Parliament.

c. A mechanical apparatus, whether simple or complicated, for grinding corn.

Not found until the 16th century; the quots. 1535 hardly prove its currency, as Luther, whom Coverdale very often follows, has *mühle* in both passages. The older word for a handmill was QUERN; in the case of a water-mill or windmill, there was little occasion to separate the notion of the machinery from that of the containing fabric which was necessarily connected with it.

1. One whose trade is the grinding of corn in a mill; the proprietor or tenant of a corn-mill. Also (*? dial.*) applied to that workman in a mill who has charge of the actual grinding.

The OE. word was *mylnweard* (lit. 'mill-keeper': see MILLWARD), denoting the custodian or manager of the mill belonging to the lord. The word *miller* would have the same application so long as 'the lord's mill' continued to be one of the customary appurtenances of a manor.

¶ b. In proverbs imputing to millers dishonesty in the taking of toll.

The proverb given by Ray seems to mean that there are no honest millers, and to allude to the use of the thumb in taking toll of flour. It is probable that this is the original form, and that Chaucer and Gaseoigne played upon the phrase, taking the 'thumb of gold' to mean one that brings profit to the owner.

¶ In mod. colloquial use the *to* of an inf. suppressed by ellipsis is often retained. (See To *prep.*)

The quots. below enclosed in square brackets are probably to be explained as instances of the idiom by which a prep. governing a relative expressed or understood is removed to the end of the sentence (cf. quots. 1674, 1711, 1726 in d). But the indefiniteness of the antecedent and the presence of a transitive verb in the sentence render the passages liable to be taken as anticipations of the modern colloquial practice, which may indeed have been partly developed from expressions of this kind.
